

Notes from UNL IdM Project Team: 5 Feb, 2009

Digital Measures

- Xiaofeng is the project contact
- Needs contact info for faculty and some staff
- Data will be loaded into DM database, cannot query directory individually
- Interested in receiving daily updates

Jigsaw reselling U of N data

- Brought to our attention by a recent increase marketing spam from Sun.com
 - Messages mention getting contact info from jigsaw.com
 - From a quick search, it appears Jigsaw accepts user-submitted data and pays per contact
 - <http://www.techcrunch.com/2006/03/23/jigsaw-is-a-really-really-bad-idea/>
 - Jigsaw contains 10,209 entries for University of Nebraska, updated Jan 13, 2009
 - Confirmed with Shared Services that they do not have a public directory service
 - Already working with UC to do rate-limiting on Peoplefinder searches
- From the format of the data that Jigsaw returns, data may have come from CSN's 4-in-1 directory
- Outside of each person requesting to be removed, not sure what recourse there is for the data to be removed from Jigsaw's database

LDAP requests

- Jim needs NUID access for CSO update web tool

LDAP monitoring

- Using [Mon](#) to monitor LDAP availability
- Doing a bind, search, and checking the reply
- Xiaofeng requested to be added to email notification of downtime

Consolidating student/facstaff username generation

- Looking at making transition in the week after Spring term
