

## IdM-steering, 9 Apr

### Requests:

- [WARN Emergency Notification system](#)
  - approved
  - *discussion of registering individuals for WARN emergency notification*
    - *how to remove separated individuals from WARN?*
    - *create module for Bb (and/or WAM, etc) to show "registered" or "not registered" status?*
      - *Blackboard portlet would serve students and faculty*
      - *a notice during parking renewal would serve faculty, staff*
      - *will not be approachable for Bb until after My.UNL programmer position is filled*

### Technical update:

- John Thiltges
  - Update on TRIO access request
    - Created two service accounts (trio-mantis, trio-wiki)
    - Authentication-only pending steering approval
    - *policy agreed upon by Steering Committee; one username/request per project - this must be made clear on the IDM request form*
  - Sponsored guest generation - <http://login.unl.edu/guests>
    - demonstration
    - *desire for education/awareness around My.UNL branding for IDM username/password*
  - Single sign-on
    - Brett Bieber working on some documentation
  - NCard photos
    - David has made the photos available (database view)
    - Working to determine the best way to load them, and possible side-effects

### Other updates:

- PeopleSoft and IdM
  - *recommendation is for EmplID to be replaced by NUID for NU system implementation (~~not NSCS, which will use NUID as User ID~~)*
- Week-long training for Aegis Sun XPRESS language authoring environment funded and will be scheduled

### For decision:

- 

### Other issues:

- NUID security
  - Treatment of NUID as an index field for developers
    - Many developers wind up using username as an index
